

Dorset Outcomes Evaluation Summary 2012-2013

KS1 Pupils

During 2012-2013 questionnaires were completed by 221 KS1 pupils from 6 schools in Dorset. 50% were boys and 50% were girls.

90.6% rated the visit as good and 95.3% said they would like Life Education Wessex to visit them again.

As a result of their session in the mobile classroom:

- 90.2% said they learnt more about what their body needs to stay healthy.
- 84.7% said they learnt more about what is inside their body.
- 83.6% said they learnt more about what to do when they are angry or lonely.
- 88.1% said they learnt more about what makes a good friend.
- 82.6% said they learnt more about when they need to take medicine and when not.

KS2 Pupils

During 2012-2013 questionnaires were completed by 567 Year 5 & Year 6 pupils from 8 schools in Dorset. 48.7% were boys and 51.3% were girls. 44.1% were Year 5 pupils and 55.9% were Year 6 pupils.

81.8% rated the visit as either very good (30.9%) or good (50.9%) and 71.3% said they would like Life Education Wessex to visit them again.

As a result of their session in the mobile classroom:

- 86.3% agreed or strongly agreed that they knew more about what their body needs to stay alive.
- 74.6% agreed or strongly agreed that they understood better how their body works.
- 87.8% agreed or strongly agreed that they understood better how medicines, smoking, alcohol (and other drugs) affect their body.
- 85.3% agreed or strongly agreed that they knew more about how to keep themselves healthy.
- 83.8% agreed or strongly agreed that they knew more about how to be safe when taking medicines.
- 87.3% agreed or strongly agreed that the visit helped them to understand how others can influence the choices they make about smoking, alcohol (and other drugs).
- 73.7% agreed or strongly agreed that the visit helped them to see that not as many young people smoke, drink alcohol (or take other drugs) as they thought.
- 75.2% agreed or strongly agreed that the visit helped them to learn to be assertive with other people.
- 81.2% agreed or strongly agreed that the visit helped them to recognise how their emotions and needs change in different situations.
- 88.3% agreed or strongly agreed that the visit helped them to think about the risks of smoking, drinking alcohol (or taking other drugs).
